# User Guide

In Admin panel you need to enable this module under
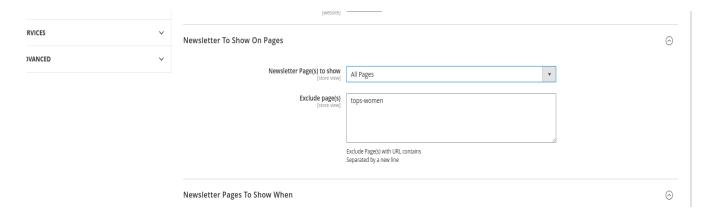

store > configuration > Bluethink Inc > Newsletter Popup

There are few options to enable/disable link on top navigation, html for popup content, image show on popup, popup height, background color, text color for newsletter module.
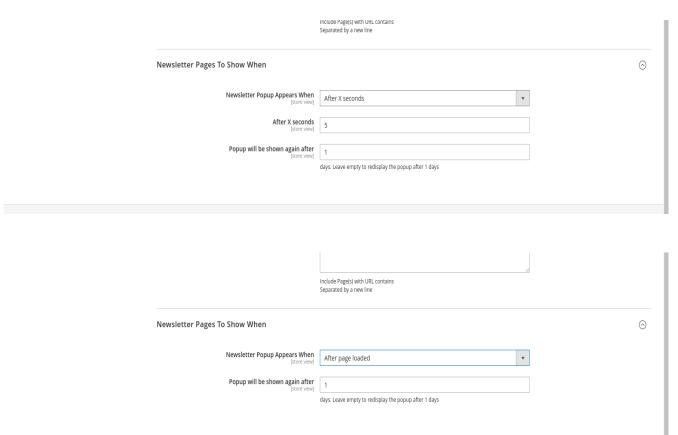

There are option to show on which page/pages newsletter popup will show and also option when it will show after page load

In Admin Panel admin user can have setting for popup show on which pages
